Approaches Used for Promoting Continuity of Care

◦ Coordinating with Head Start, prekindergarten, or other early learning programs to create a package of arrangements that accommodates parents' work schedules	Yes
◦ Inquiring about whether the child has an Individualized Education Program (IEP) or Individual Family Services Plan (IFSP)	Yes
◦ Establishing minimum eligibility periods greater than 12 months	
◦ Using cross-enrollment or referrals to other public benefits	Yes
◦ Working with IDEA Part B, Section 619 and Part C staff to explore how services included in a child's IEP or IFSP can be supported and/or provided onsite and in collaboration with child care services	
◦ Providing more intensive case management for families with children with multiple risk factors;	
◦ Implementing policies and procedures that promote universal design to ensure that activities and environments are accessible to all children, including children with sensory, physical, or other disabilities	

<ul style="list-style-type: none"> ◦ Other: 	<p>Child care policy specifically states that child care and family plans are developed on a case-by-case basis depending on the needs of the parent and the child. The child care assistance program is partnering with Kansas Early Head Start to provide child care for families participating in the Kansas Early Head Start Child Care Partnership Program, serving families with children with multiple risk factors and accommodating the parents' work schedules as well as time needed to work on those other risk factors. To accomplish this, child care benefits for these families are authorized in blocks of time rather than specific hours of care needed. Licensed Head Start and Kansas Pre-School Programs may enter into an agreement with DCF to provide wrap around care for families eligible for child care subsidy.</p>

Consumer Education Website

<p>How the Lead Agency ensures that its website is consumer-friendly and easily accessible</p>	<p>The Kansas Quality Network (KQN) was designed from the start to be consumer friendly for families, providers and community members. By categorizing the main site pages into these three groups, it is easy for consumers to self-select their entry point, and quickly find the resources they need. KQN is a mobile optimized website, allowing consumers to access information with mobile and desktop devices. It is a user-friendly website that is accessible to everyone including the disabled and families that speak languages other than English. Website sections and categories were carefully planned and information presented so it will be easy for users to find. The website contractor, University of Kansas-Center for Public Partnerships and Research (KU-CPPR) worked with DCF staff to format headings, subheadings, and paragraphs to ensure well-formatted content. The website contractor utilized a website platform that allows for effective navigation, using hover-overs and drop-down menus, limiting site clutter and off site navigation. The websites color scheme is bright primary colors with a good contrast between background and text, which is legible and easy to read. To test the site's user friendly features, accessibility and resources provided, the QRIS Links to Quality teams reviewed the KQN, during a soft launch. L2Q team members were assigned scenarios (ex: teen mom looking for early childhood services and housing), and asked to document how effective their searches were, identifying missing links and making recommendations for improvements.</p>
<p>How the website ensures the widest possible access to services for families that speak languages other than English</p>	<p>A Goggle Translate plugin has been added to the KQN website, which is the industry standard for language translation. With over 100 languages, Goggle Translate makes the website available to a wide variety of consumers. The Goggle Translate plugin will detect the default browser language and translate it automatically, or it will allow consumers to select their preferred language from a drop-down menu.</p>
<p>How the website ensures the widest possible access to services for persons with disabilities</p>	<p>In compliance with the State of Kansas established accessibility standards (incorporating both federal Section 508 and World Wide Web consortium guidelines adopted by industry), the KQN website has been evaluated by the Accessibility Management Platform (AMP). This tool analyzes the accessibility of web services and content using state standards, identifying potential accessibility issues, which are then incorporated into a plan to ensure ongoing efforts to improve accessibility. The information has been designed to be converted to Braille, enlarged, or for synthetic speech via assistive technologies. This includes taglines for all photos for synthetic speech and the captioning of audio for the hearing impaired.</p>
