

STATE/TERRITORY PROFILE - WYOMING

This profile highlights a current innovative effort to promote a subsidy system that is child-focused, family friendly, and fair to providers. It also provides demographic information, Early Care and Education (ECE) program participation and funding, subsidy innovation and program integrity information, program quality improvement activities, and professional development and workforce initiatives. Consumer Education Website

How the Lead Agency ensures that its website is consumer-friendly and easily accessible	The Department’s Early Childhood webpage is consumer friendly in that all information is presented in plain language based on an 8th grade reading level, and is obtainable by one (1) or two (2) clicks (easy navigation). In addition, the Department posts frequently asked questions for providers, parents, and consumers. The website can be translated in various languages supported by Google.
How the website ensures the widest possible access to services for families that speak languages other than English	The Department’s website can be translated in various languages supported by Google.
How the website ensures the widest possible access to services for persons with disabilities	The Department’s website provides an extensive list of statewide resources for services that are accessible by any consumer, parent, or provider. The Department’s website embeds a link in a post, as it’s more useful to describe the link, rather than just telling the reader to “click here.” In addition, the Department’s website utilizes black text on a white background as it is the best general practice, because it’s readable for most audiences. For users with mobility problems, the clickable item has a wider range so the user can click on it within the item’s general area. Generally, the Department’s website breaks text into smaller paragraphs and uses simple, straightforward language in the active voice.
